Profesional Experience

Technical Support Staff
Holberton School - Part-time
Feb 2022 - June 2022 · 5 mos
Lead the academy's new student training processes and provide them:

- **Workshops about the technology they are seeing in the curriculum, e.g. Pointers in C, ObjectOriented Programming in Python, and how to create an API with Flask.**
- **Troubleshooting sessions**
- **One-on-one sessions with students more than 3 times a week**

Education

Physics
University of Antioquia
2017 - 2021
UnderGraduated

Software developer
Holberton School
Sep 2021 - June 2022

Projects

Airbnb Clone:
Test-driven full-stack Airbnb web application clone running on three Amazon EC2 using NGINX as a web server and Gunicorn as the application server. (Technologies used: Python, Flask, MySQL, Linux)

Simple Real Estate:
Real estate system application with three types of users. Developed with Python on top of the Django framework, Postgres as the database, Redis for the cache, and Celery for asynchronous tasks, as well as Nginx as the web server

Languages

- **Spanish - Native**
- **English - B1**
